

Figure 1: A diagram showing three sets of vertical bars. The first set has two bars, the second has three bars, and the third has two bars. The bars are arranged in a row, with the first set on the left, the second in the middle, and the third on the right.

Figure 2: A diagram showing three sets of vertical bars. The first set has two bars, the second has three bars, and the third has two bars. The bars are arranged in a row, with the first set on the left, the second in the middle, and the third on the right.

Figure 3: A diagram showing a set of five vertical bars followed by a set of two vertical bars. The bars are arranged in a row, with the five-bar set on the left and the two-bar set on the right.

Figure 4: A diagram showing three sets of vertical bars. The first set has three bars, the second has two bars, and the third has two bars. The bars are arranged in a row, with the three-bar set on the left, the two-bar set in the middle, and the two-bar set on the right.

Figure 5: A diagram showing a set of three vertical bars followed by a set of two vertical bars. The bars are arranged in a row, with the three-bar set on the left and the two-bar set on the right.

Figure 6: A diagram showing three sets of vertical bars. The first set has two bars, the second has three bars, and the third has two bars. The bars are arranged in a row, with the first set on the left, the second in the middle, and the third on the right.
